CAVALIER[®] 2L

An aerial photograph of a vast agricultural field, likely soybeans, showing distinct rows of crops. A large, semi-transparent white rectangular box is centered over the field, containing text. The background shows a flat landscape under a clear sky, with some distant structures and trees on the horizon.

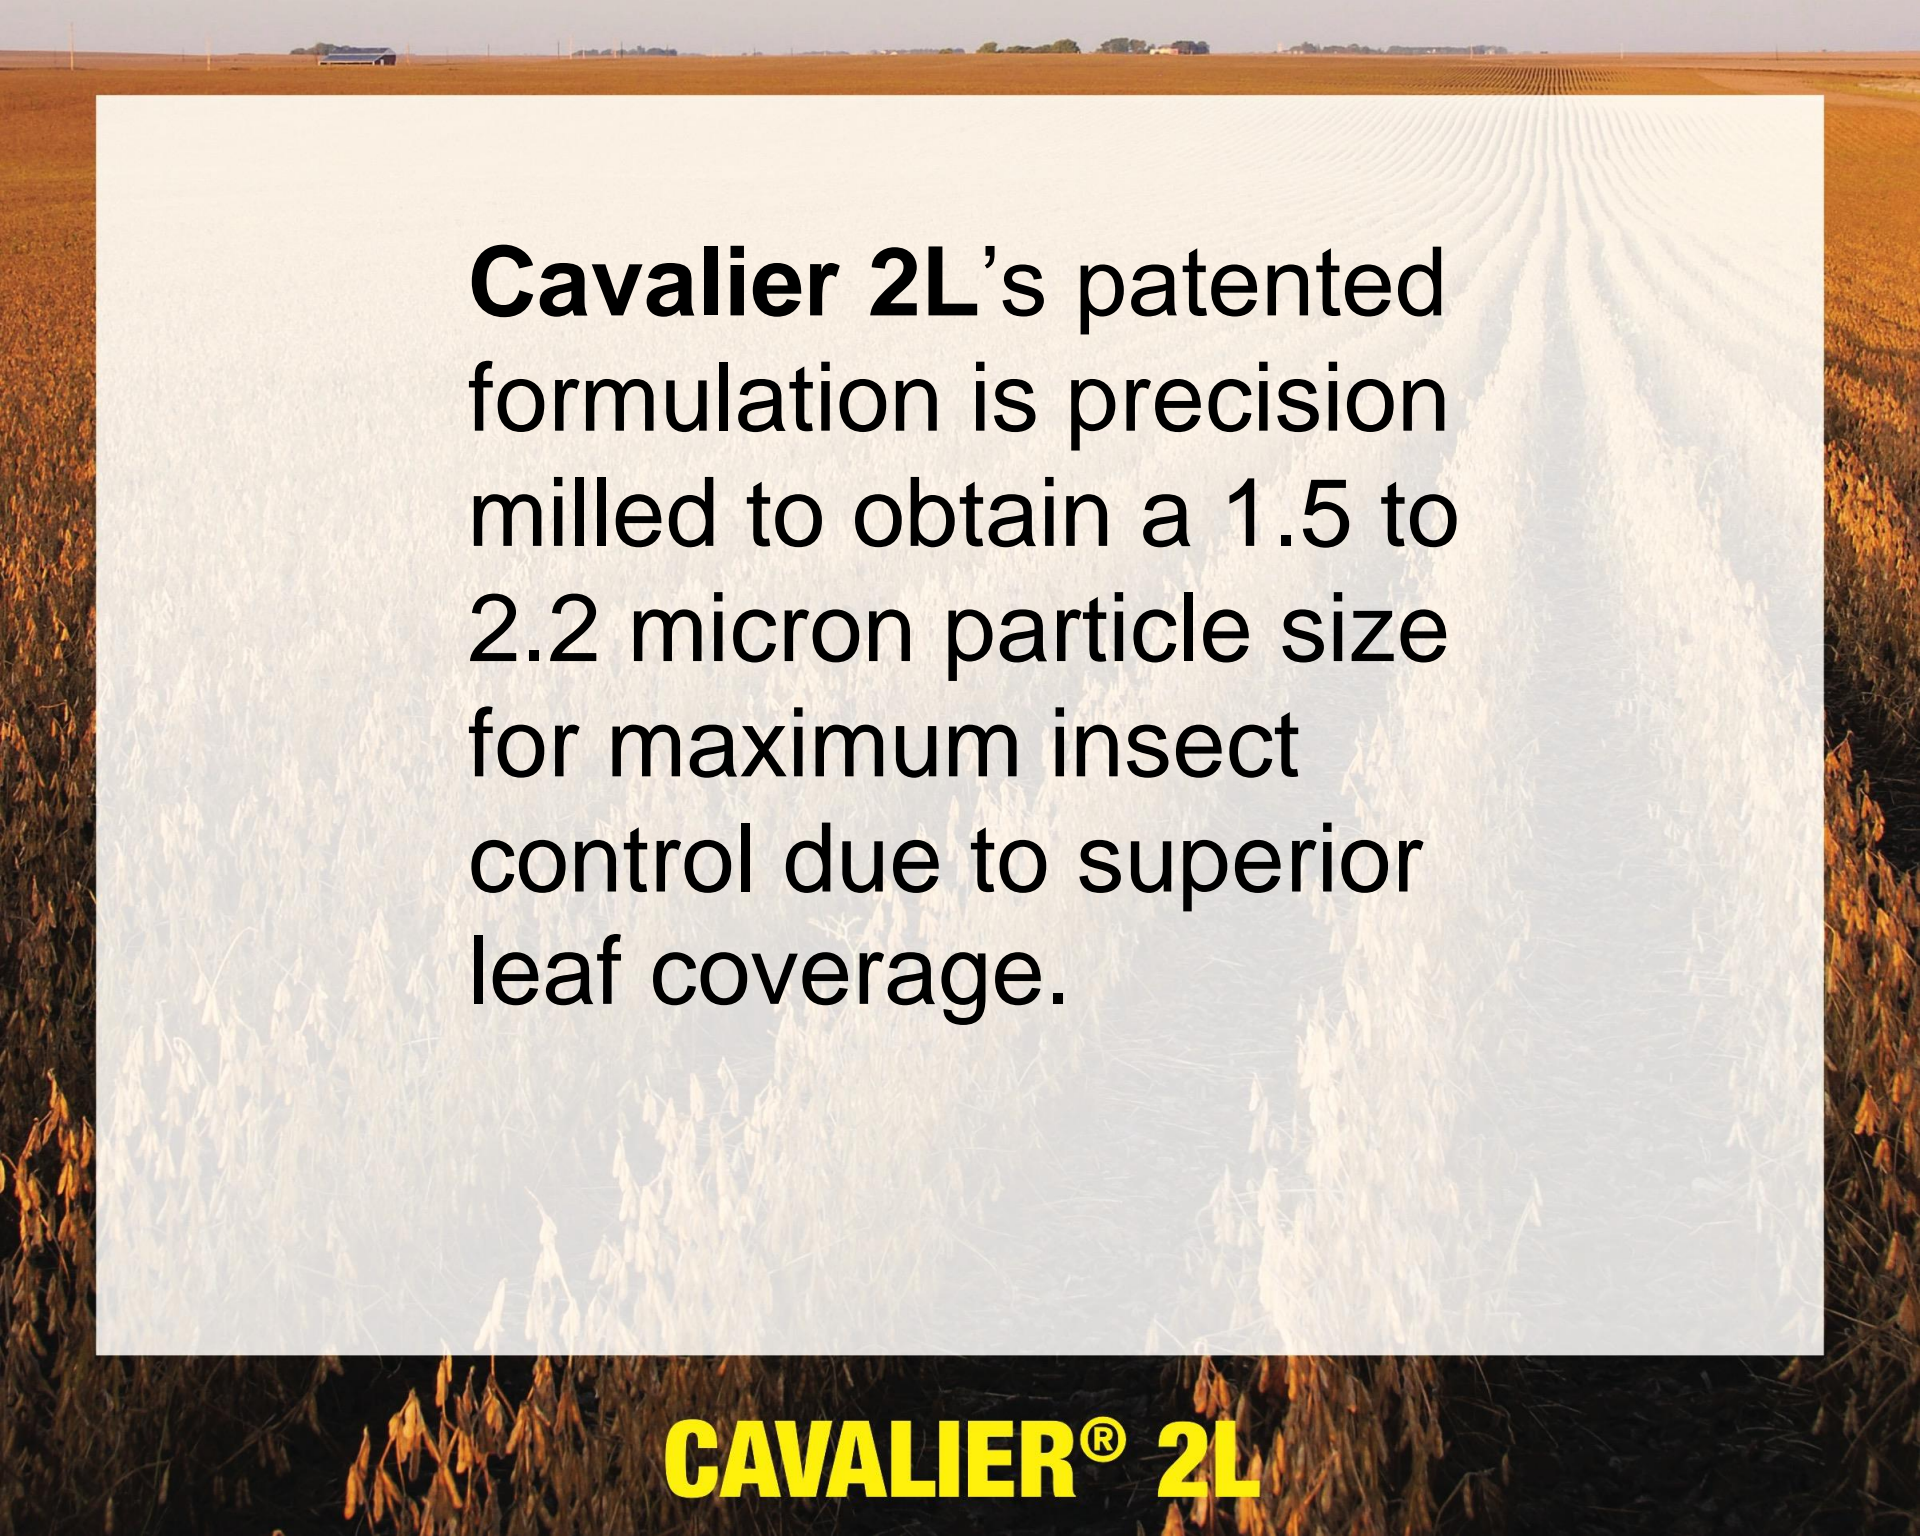

Producers who tankmixed
Cavalier 2L
with their fungicide on their
early planted beans
in 2014 were protected
without flaring secondary
insect pests, such as
soybean loopers and
corn earworms.

Across the Midsouth,
yield increases have
ranged consistently
from two to seven
bushels per acre on
Cavalier 2L treated
soybeans.

CAVALIER[®] 2L

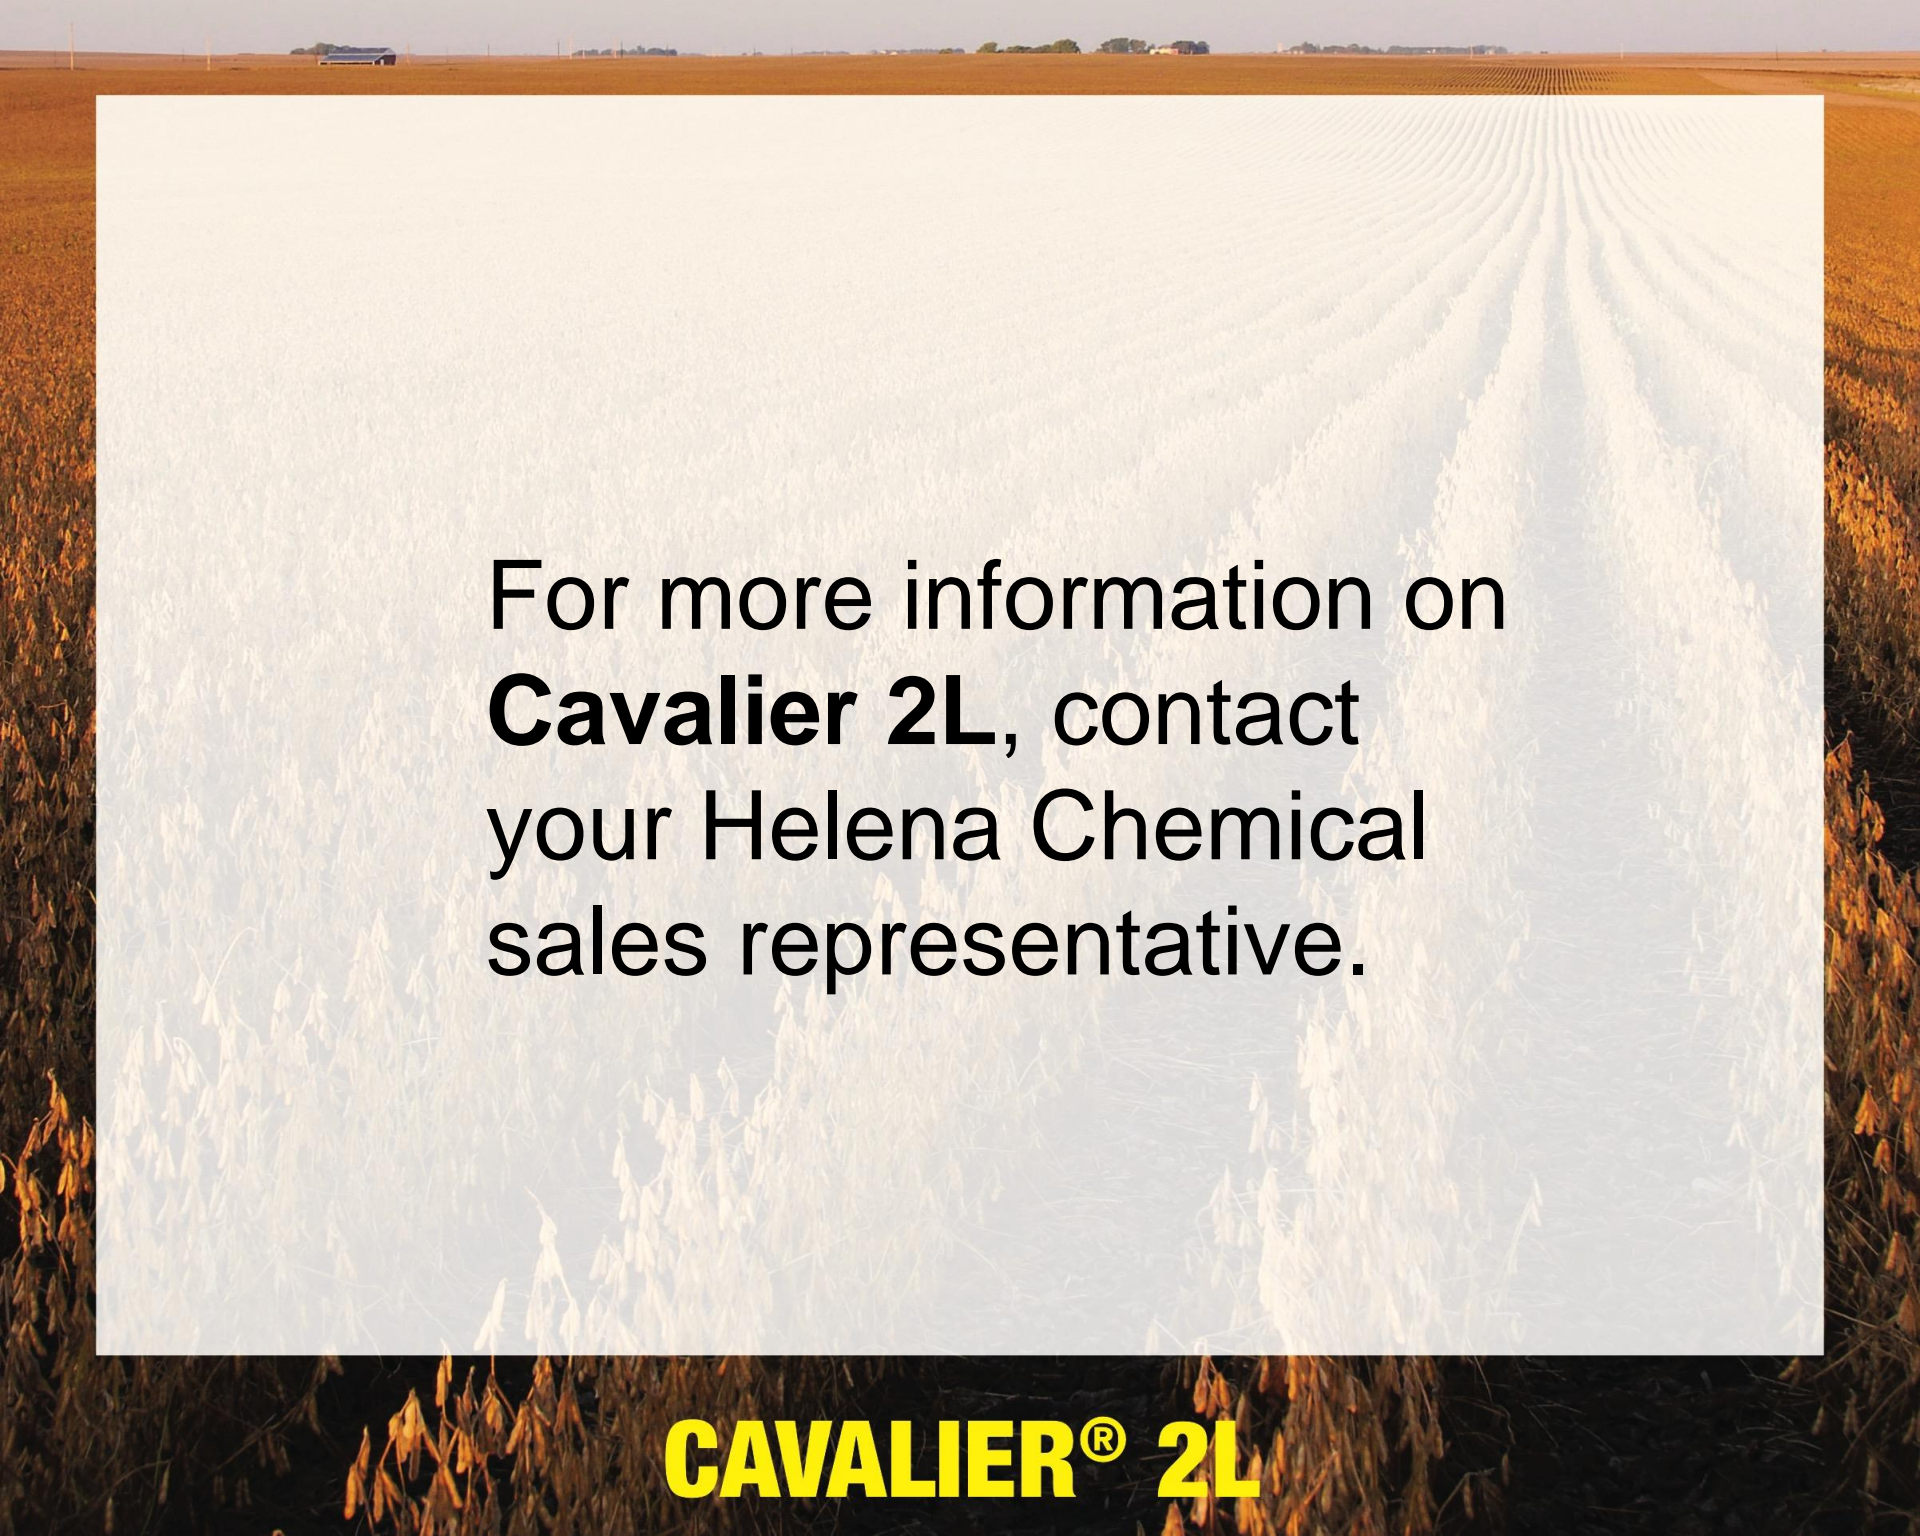

Cavalier 2L's patented formulation is precision milled to obtain a 1.5 to 2.2 micron particle size for maximum insect control due to superior leaf coverage.

CAVALIER[®] 2L

In addition to soybeans,
Cavalier 2L is labeled
for peanuts, citrus, and
tree, nut and vine crops.
