## For Sesbania Control in Rice in LA 2012

NIS vs COC vs MSO

C & J Consultants Pioneer, LA

- New rice herbicide in development from Gowan USA.
- Discovered by SDS in Japan. Used to control sedges, watergrass and aquatics in transplanted rice.
- HPPD Class of Chemistry.
- Activity is by absorption by stems, buds and roots as a pre or early post flood treatment.
- Excellent activity on sedges, springle top and some aquatics has been recorded in AR LA & MO.
- Long residual.
- BUTE

- Thanks for your support of the Gowan product line and of Kevin Stewart, Richard Arnold, Craig Sandoski and myself.
- If anyone has any thoughts or comments on Permit Plus for the control of smell melons, gourds and ground cherry I would like to visit with you.
- Thanks again.
