Overview

AgSmarts is a *Precision Ag* Technology company dedicated to helping producers increase yields while reducing operational costs & environmental impacts

- Founded by Industrial Controls Experts & Farmers
- Embedding predictive intelligence & automation into existing agriculture processes and equipment

Applications for AgSmarts' platform include:

- Irrigation Optimization
- Nutrient Management
- Pest & Disease Prevention

Problem

Agricultural production highly complex and inefficient yet growing rapidly across globe

- Wastes water and energy
- Contributes to pollution
- Costs producers time, money and yield loss

Size of Problem

- 500bil gallons of freshwater wasted
- \$7bil wasted operational expenses
- \$25bil losses from suboptimal yields

Agriculture's waste affects everyone!

Solution

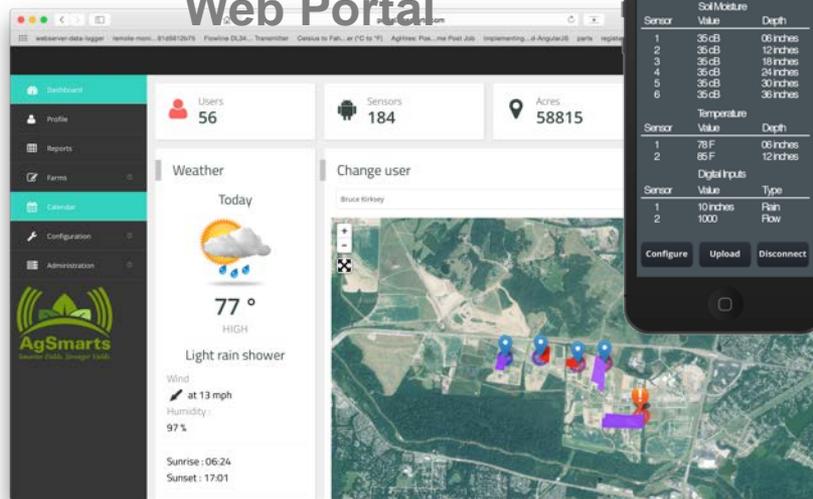

Agnostic and Flexible HW/SW Platform Embedded Intelligence for Agricultural Production

Field Node Sensor (FNS) Stations

Mobile application
Web Portal

Intelligent Agriculture Controller

Predictive, Crop-specific Recommendations

Hardware

Rugged,
reliable
hardware
for life in
the “wild”

Flexible Telemetry Options

- Bluetooth (BLE)
- Mesh radios
- GPRS/Cellular
- Wifi (Controllers)
- Ethernet (Controllers)

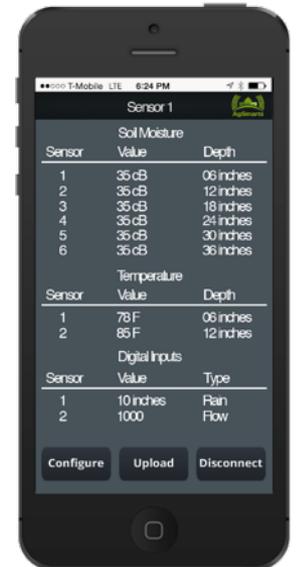

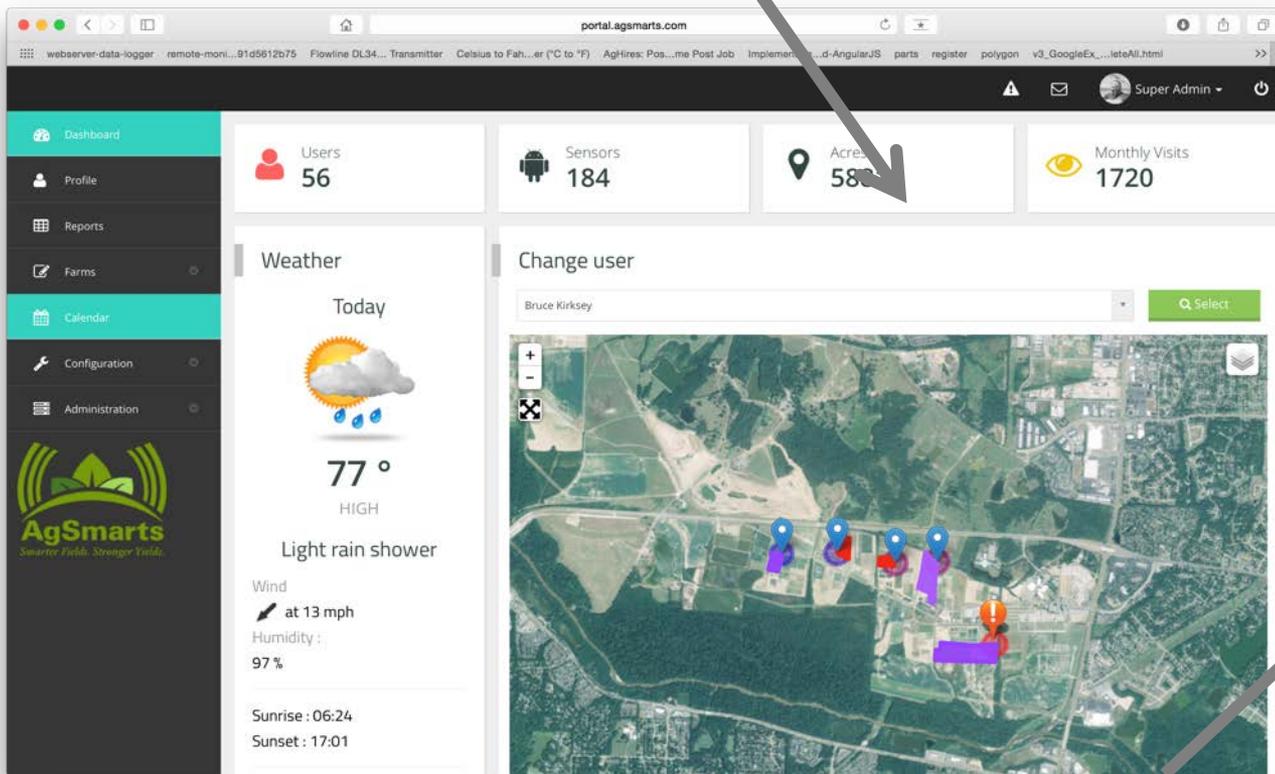

Configurable Sensing Inputs
allows customer to choose
exactly what they need

Software Layers

Web Portal for analytics, alerts and reporting

Android and iOS apps (BLE) for hardware configuration, data viewing, capture and transfer

Solution in action

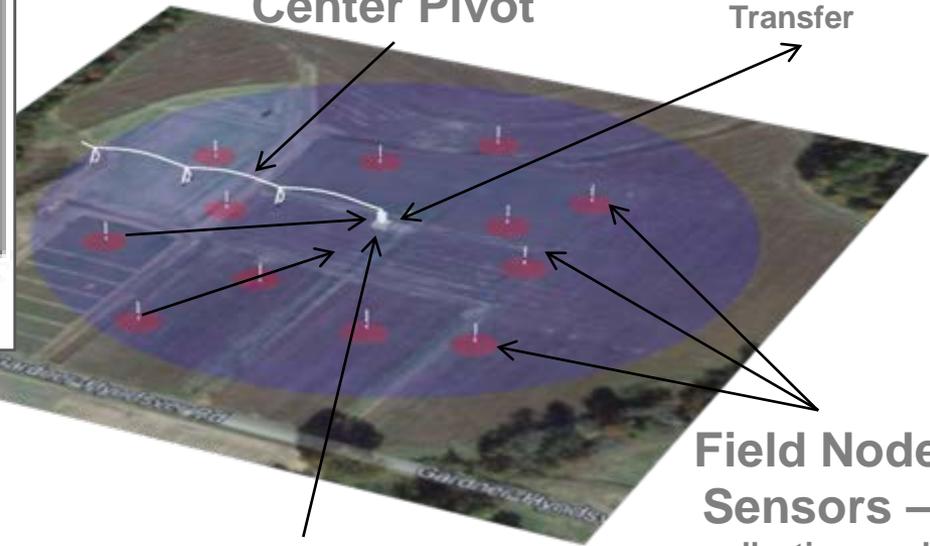

Cloud data leveraged
across portfolio

Data Transfer

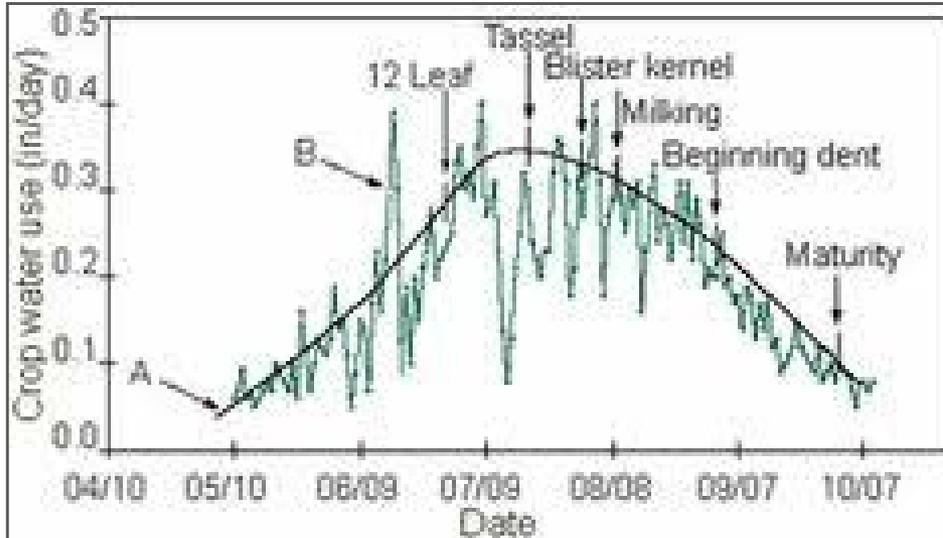

Center Pivot

Field Node Sensors –
collecting and reporting
environmental data

Intelligent Irrigation Controller – interpreting data and delivering recommendations to producers

Corn Soil Moisture (ET) Curve

Site Characteristics

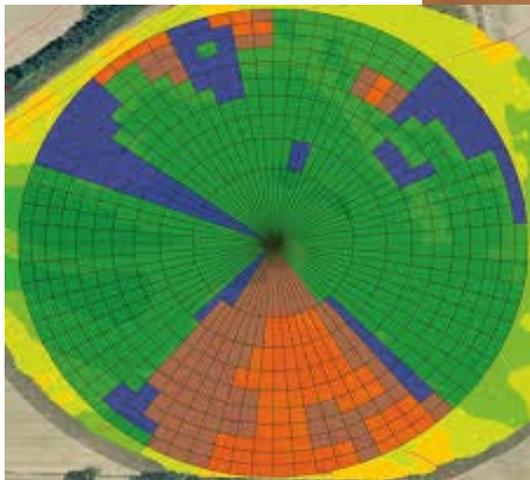

Soil type(s): Sandy Loam/Clay Loam
Irrigation Water Salinity : EC or TDS

Benefits

Intelligent Irrigation Automation:

- Optimizes crop yield/revenue potential
- Reduces irrigation related operational costs
- Conserves resources – water, energy, inputs
- Reduces negative effects on environment
