Stoller USA

- ▶ Louisiana ranks first in the US sugar cane acreage and second in production.
  - ▶ 550,000 acres total
- 

# Stoller Products in Sugar Cane Enhancing Productivity From Planting to Harvest

Richard M. Johnson and Deise Paula da Silva

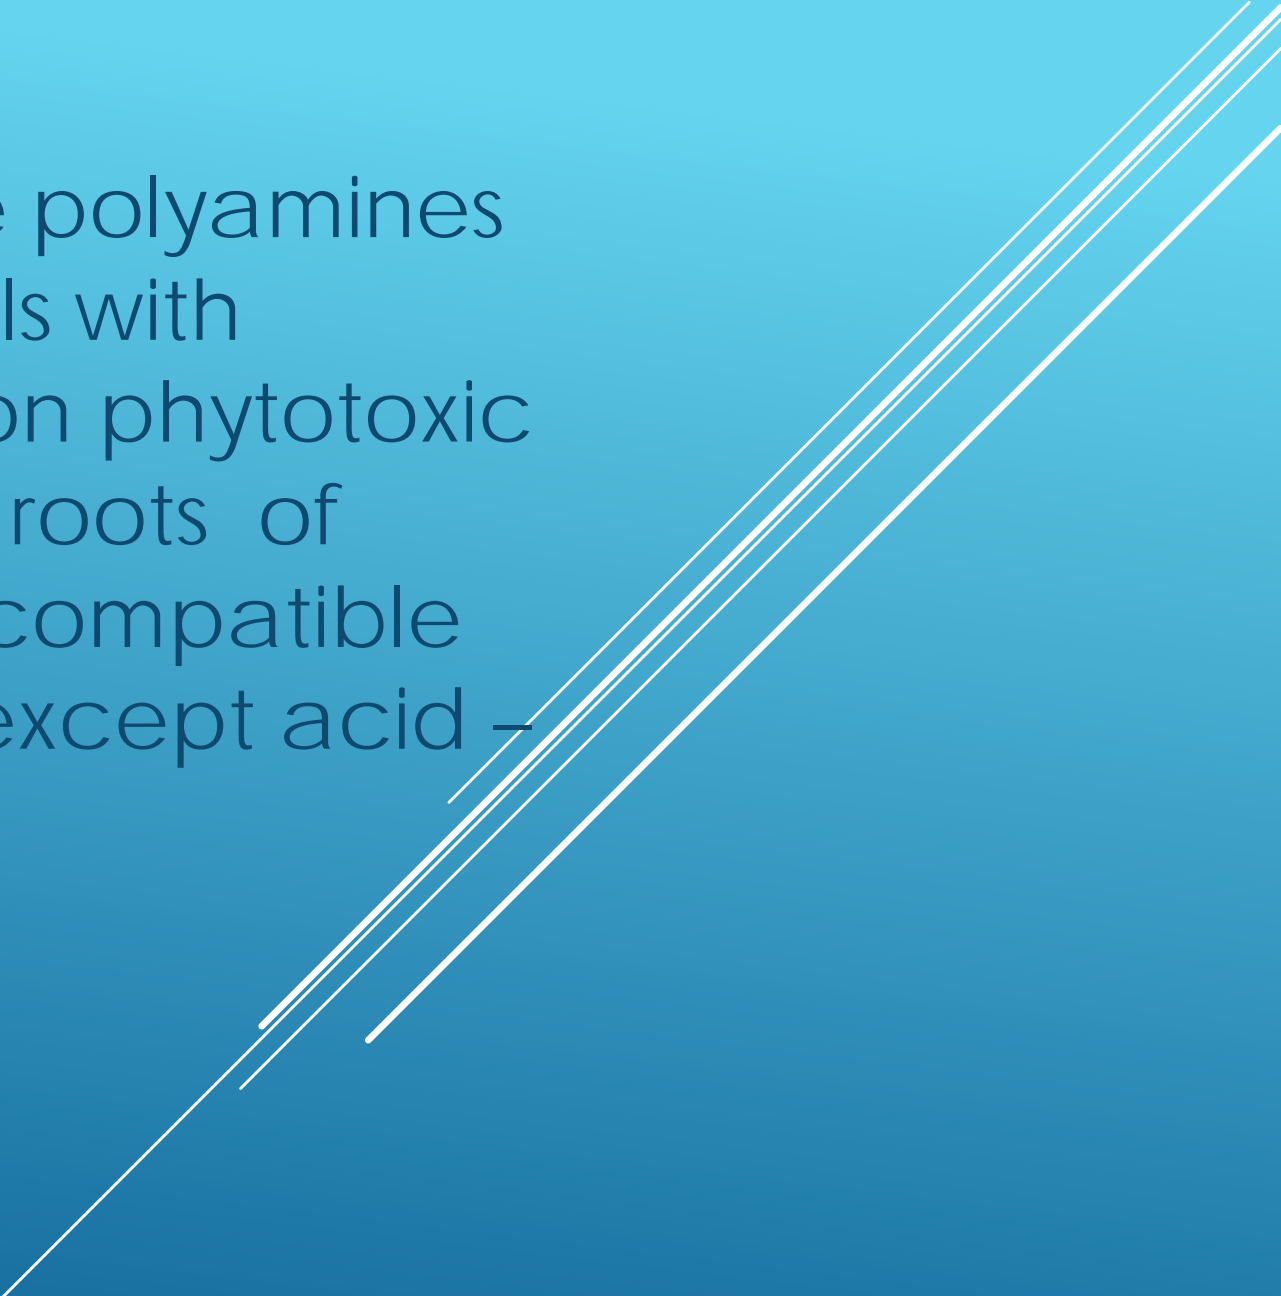

USDA/ARS, Sugarcane Research Unit, Houma, LA

Faculty of Agricultural Sciences, São Paulo State University Botucatu, São Paulo, Brazil

- ▶ Keylate Cobalt on Sugar Cane increased tons per acre and total refined sugar in a USDA study.
  - ▶ Keylate Cobalt was applied with Glyphosate
- 

Stoller Keylate Products are polyamines that actually chelate metals with multiple bonds. They are non phytotoxic when applied to either the roots of plants. Stoller Keylates are compatible with with most chemicals, except acid – forming products

A decorative graphic consisting of several parallel white lines of varying thicknesses, slanted diagonally from the bottom-left towards the top-right, set against a blue gradient background.
