LACA 2020

Who is Agrinos

-Agrinos started in 2009 but the technology was developed in the 1980's out of Texas A&M.

-Ag Biological R&D, Production and Distribution company.

-Enjoyed typical start-up challenges through 2013.

-2014 Manor Group purchased majority share of company.

-3 major shareholders hold 76% of Agrinos:

- Manor: 49%
- Eurochem: 15%
- Havfonn: 12%

-Long term vision and investment horizon with focus upon sustainability.

-Recent \$15m equity injection to the company by 3 key shareholders.

Product portfolio delivering must have attributes

iNvigoRATE[®]

- Creates a highly productive microbial system in the soil
- Promotes absorption of nitrogen and critical minerals to increase the level of bioavailable nutrients to the crop root system

Benefits

- Stimulates root biomass formation resulting in a more vigorous root system
- Enhances crop quality and fertility under both favorable and stressful growth conditions

B Sure[®]

- A unique nutrient solution that increases the activity of multiple critical metabolic pathways in the crop
- Contains carbon, nitrogen, true protein, amino acids, and essential metabolic micronutrients

Benefits

- Provides a source of time-released nitrogen that is highly bioavailable and complements applied nitrogen
- Enhances crop tolerance to environmental and physiological stresses

UpLift[™]
5-0-0

- A fertility solution that increases crop productivity and supports soil health
- Contains organic, biologically-extracted micronized chitin, amino acids, and other crucial plant nutrients

Benefits

- Improves root structure to support plant growth and productivity
- Strengthens plant function to increase tolerance to environmental stresses
- Enhances soil health to support plant well-being

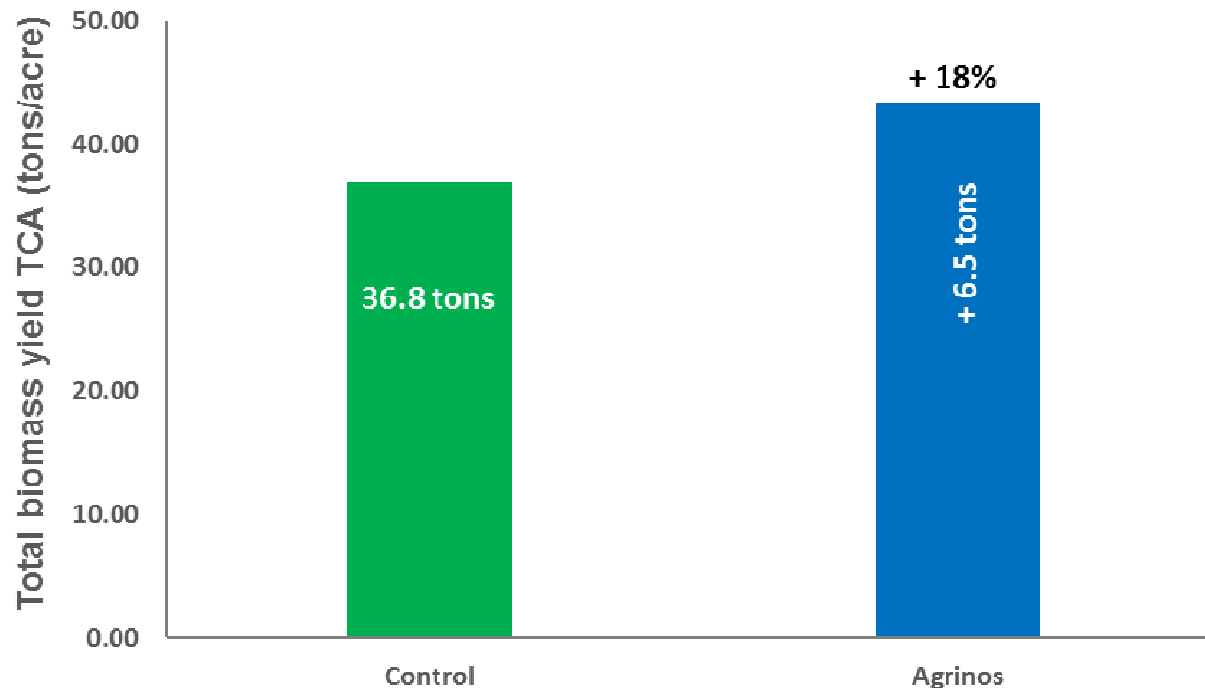

USA – Sugarcane Billet Treatment Trial 2016 Louisiana

iNvigorate®

B Sure®

Agrinos
5-0-0

**Sugarcane Billet treatment study : Biomass yield
Louisiana, (tons/acre), 2015**

➔ Agrinos plots yielded 18% greater sugarcane biomass than the standard farmers control.

Agrinos®

Confidential

Period	Planted September 2015 Harvested 2016
Crop / Hybrid	Sugarcane L01-299
Location	Bunkie, Louisiana
Products / Rates	iNvigorate® @ 2qt/acre + BSure® @ 2 qt/acre + Agrinos 5-00 @ 1 lb/acre & All billets treated with Azoxystrobin and Propiconazole fungicide
Field Size / Replications	Large acreage strip plots Agrinos 40 acres Control 27 acres 2 reps in study
Trial performed by	<i>Agrinos with grower</i>
Method Comments: Billets were planted with a Traube (Costa Rican) planter (dipped treatment style)
