

Dennis Long @DLongBelchim · Now

Pyrethroid resistant RSB robbing your yield & quality? In Little Rock, AR today for ACMC to deliver the "Abundant Supply of TENCHU" & ROI message; we got snowed out. #thinkrice @ARcropadvisers @ARCrops @RiceArkansas @Think_Rice @usaricenews #rice

TENCHU 20SG: *ABUNDANT SUPPLY for Mid-South in 2024*

Rain, sleet or snow; you will have ABUNDANT supply. Thus, no Sec. 18's for other RSB products in 2024!

Missed ACPA opportunity to update everyone on SUPPLY and technical information on how to use TENCHU 20SG for highest ROI in the battle to control rice stinkbug damage.

Follow me for updates starting soon and throughout the season

**It's Time To Get
Serious About
Tenchu**

The Most Profitable Option

\$25/Ac More ROI vs Pyrethroid

	Rate oz/Ac	Cost Treatment \$/Ac	Cost Airplane \$3 GPA	Total RSB Application Cost \$/Ac	% Peck	U.S. Grade	\$/Ac Discount (200 bu/ac avg.)	TOTAL GROWER COST \$	ROI To The Grower \$/Ac
Untreated	--	--	--	--	4.0	No. 4	60	60.00	0
TENCHU^{20SG}	8.0	11.00	8	19.00	1.2	No. 1	0	19.00	\$41.00
L-Cy	3.65	5.50	8	13.50	2.8	No. 3	30	43.50*	\$16.50
Mustang Maxx	4.0	6.15	8	14.15	3.1	No. 3	30	44.15*	\$15.85
Carbaryl	32	16.75	8	24.75	1.9	No. 2	10	34.75*	\$25.25
Malathion	32	11.25	8	19.25	2.6	No. 3	30	49.25*	\$10.75

* NOTE: Data does not capture cost of:

- Second application for product that failed
- Damage or kernel abortion early on that resulted in actual yield loss

Dr. Bateman, UAR – Average of six trials 2021-2022.
