

Provisia Rice Update

February 9, 2023

Marksville, LA

Proven to Perform

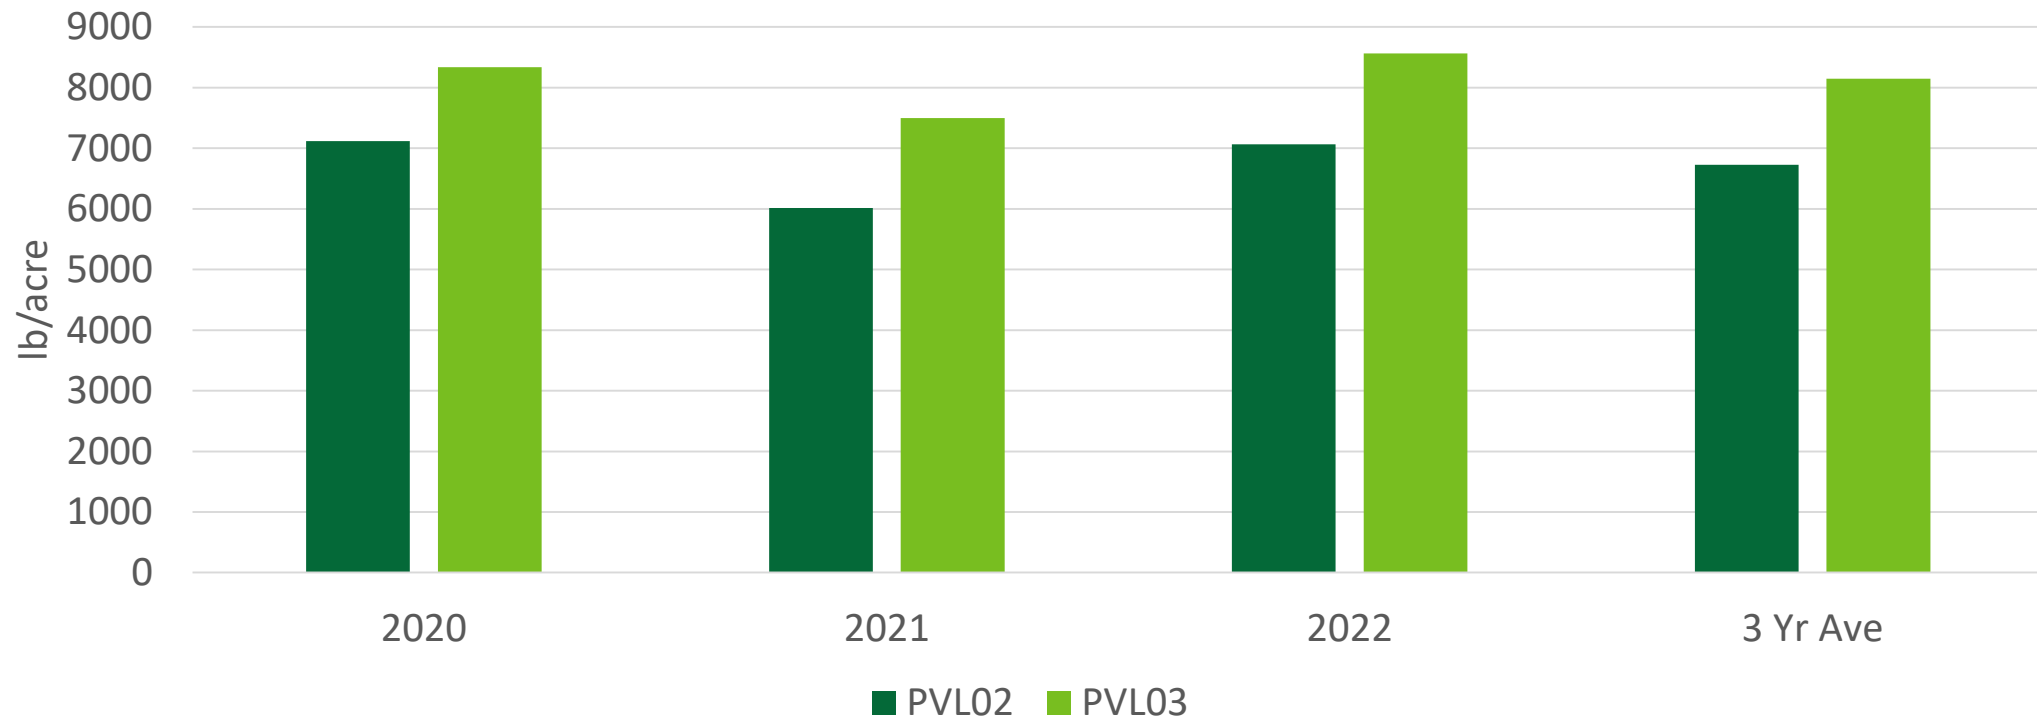

Agenda

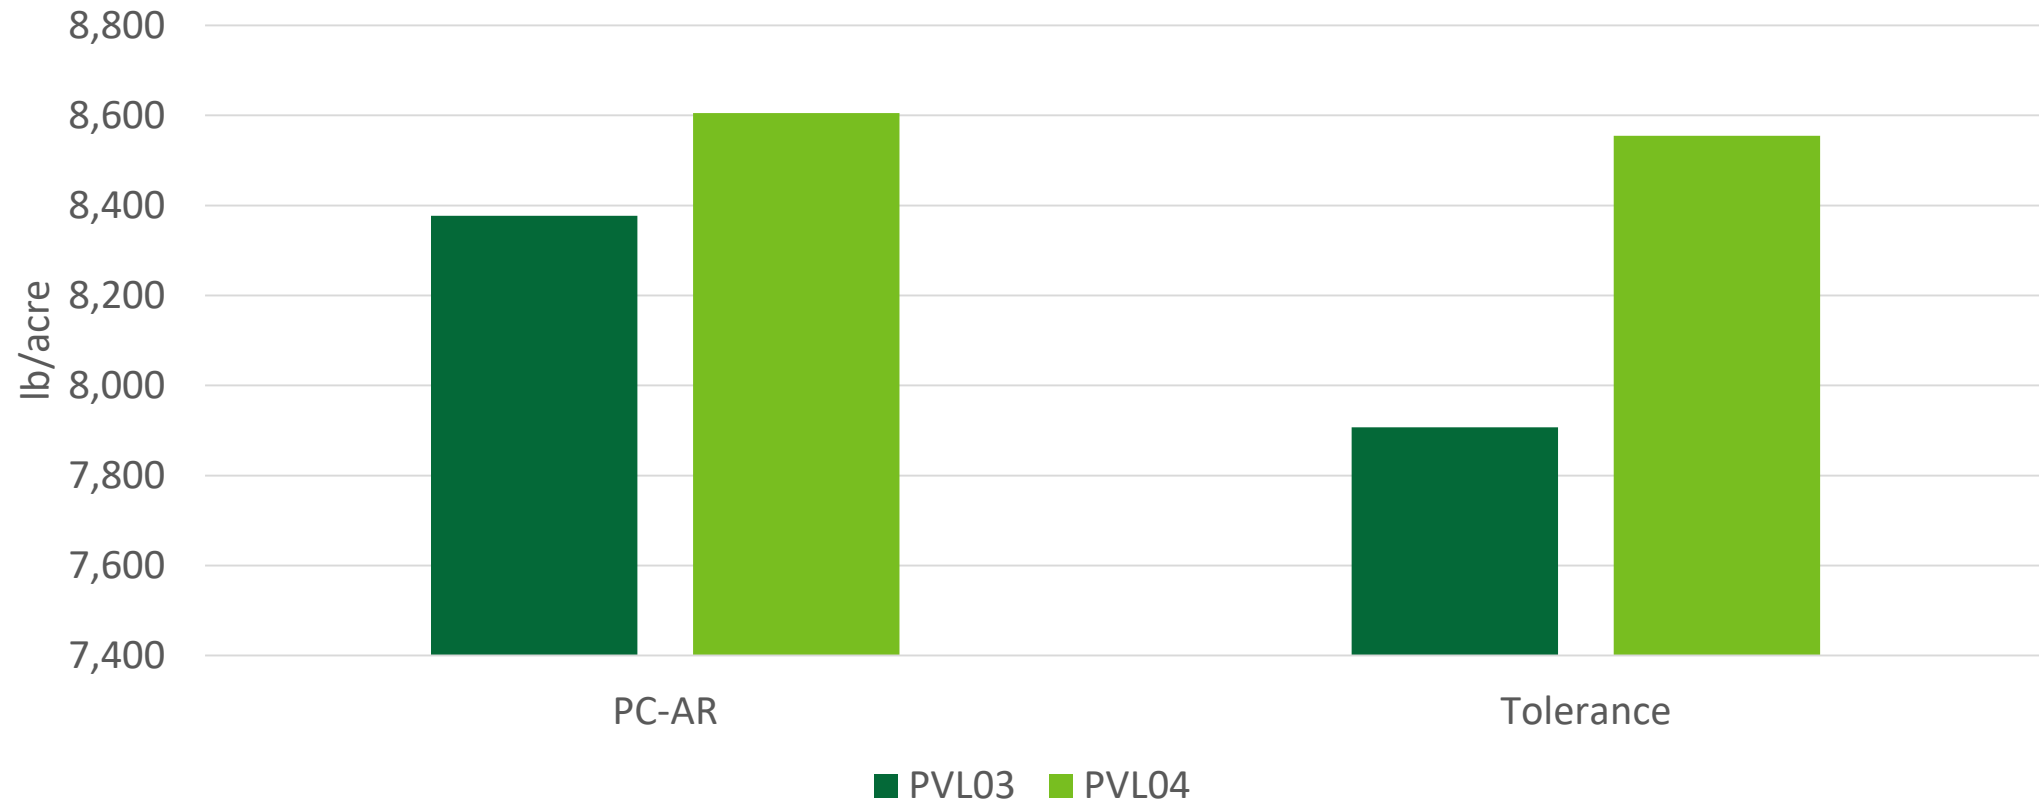

- Provisia varietal/pipeline performance
- ACCASE outcross and Provisia Working Group
- Best Management Practices for Provisia Rice System

Provisia Variety Performance

LSU Variety Trials

Provisia Pipeline

Provisia Pipeline

ACCASE Outcross/Provisia Working Group

- About 15 incidences of confirmed Provisia outcross to weedy, imi-resistant rice
- Provisia Working Group established and convened in August
- BASF updated Stewardship Guidelines/Best Management Practices
- Rollout meeting in October

Provisia Rice System BMP's

- Start Clean/Stay Clean
 - Residual grass herbicides
 - Command, Prowl, Facet, new FMC >2025
 - Residual broadleaf herbicides
 - Sharpen, Prowl, Facet, Gambit, Valor (>30 days preplant)
 - Glyphosate

Provisia Rice System BMP's

- Coverage
 - Proper spray volume (10-15 gpa)
- Antagonism
 - Tank mix other herbicides early in the season when weeds are small
 - 2nd and/or 3rd Provisia application should be applied alone
 - Don't mix with Stam, 2,4-D, Grasp, or Regiment
- Zero Tolerance for escapes!
 - Rogue physically or chemically
 - Clean harvest machines to stop the spread

Provisia Rice System BMP's

- Don't Use Provisia Rice System in Green Rice (Crawfish)
- Don't allow escapes to go to seed in Crawfish Production
